

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claim 1 (currently amended): A substance delivery device for insertion into a body cavity, said device includes a support frame having at least two resilient arms which retain said device in the body cavity, wherein each resilient arm is capable of receiving and releasing a separate substance delivery means capable of releasing substance into the body cavity.

Claim 2 (previously presented): A substance delivery device as claimed in claim 1, wherein the substance is a drug.

Claim 3 (previously presented): A substance delivery device as claimed in either claim 1 or claim 2, wherein said device is an intra-vaginal release device.

Claim 4 (previously presented): A substance delivery device as claimed in claim 3, wherein the substance is released from the substance delivery means through osmosis.

Claim 5 (previously presented): A substance delivery device as claimed in claim 1, wherein the substance delivery means are rounded.

Claim 6 (previously presented): A substance delivery device as claimed in claim 1, wherein at least one of the substance delivery means is flexibly attached to a corresponding arm.

Claim 7 (previously presented): A substance delivery device as claimed in claim 6, wherein the at least one of the substance delivery means is attached to the corresponding arm by a ball and socket mechanism.

Claim 8 (previously presented): A substance delivery means for attachment to a substance delivery device as claimed in claim 1.

Claim 9 (previously presented): A substance delivery device as claimed in claim 1, wherein the support frame is in the form of a wish bone.

Claim 10 (previously presented): A substance delivery device as claimed in claim 9, wherein the arms are biased outward from a central section of the support frame.

Claim 11 (previously presented): A substance delivery device as claimed in either claim 9 or claim 10 characterised in that the support frame is made of nylon.

Claim 12 (previously presented): A substance delivery device as claimed in any one of claims 9 to 10 characterised in that that the arms are sufficiently pliable to be moved together to allow the substance delivery device to be effectively compressed.

Claim 13 (previously presented): A substance delivery device as claimed in any one of claims 9 to 10, wherein the arms are capable of interlocking for removal or insertion.

Claim 14 (previously presented): A substance delivery device as claimed in any one of claims 9 to 10 characterised in that the support frame includes a locator to enable the substance delivery device to be readily located and removed from *in situ*.

Claim 15 (canceled).

Claim 16 (canceled).
